SUSHOVAN BERA

Java Developer | Aspiring Java Full Stack Developer

Bangalore, India | Phone No: 8101775367
berasushovan250@gmail.com | LinkedIn | GitHub

Professional Summary

B.Tech Information Technology candidate with foundational knowledge of Core Java, Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), SQL, and web technologies. Currently undertaking Java Full Stack Development training at QSpiders, Bangalore. Academic project experience includes Java GUI development, REST API integration, and CNN-based image classification using Python. Seeking an entry-level Java Developer or Java Full Stack Developer opportunity.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL
Core Java and OOP: Classes and Objects, Constructors, Encapsulation, Inheritance, Polymorphism, Abstraction, Method Overloading, Method Overriding, Interfaces, Abstract Classes, Exception Handling, String Class, Object Class
Java Full Stack Technologies: JDBC, Servlets, JSP, Spring, Spring Boot, Hibernate
Web Technologies: HTML5, CSS3, Responsive Web Design, DOM Manipulation, REST API Integration
Database: DBMS, RDBMS, MySQL, Oracle, SQL Queries, DDL, DML, DQL, Joins, Subqueries, Aggregate Functions, GROUP BY, Normalization
Tools: Git, GitHub, VS Code, Eclipse, Power BI, MS Excel, MS Word

Training

Java Full Stack Development **Present**
QSpiders, Bangalore

- Developing knowledge of Core Java, OOP, DSA, exception handling, and Java application development.
- Learning HTML5, CSS3, JavaScript, SQL, JDBC, and relational database concepts.
- Studying Java web and backend technologies, including Servlets, JSP, Spring, Spring Boot, and Hibernate.

Projects

Tic-Tac-Toe Game *Java, AWT, Swing*

- Developed a two-player desktop game with a 3x3 game board and player-turn management using Java AWT and Swing.
- Implemented win and draw detection using two-dimensional arrays and conditional logic.

Simple Weather Application *HTML, CSS, JavaScript, WeatherAPI*

- Built a responsive web application to retrieve and display real-time weather information through API integration.
- Implemented asynchronous `fetch()` requests, DOM manipulation, input validation, and error handling.

Lung Cancer Detection System *Python, TensorFlow, Keras, CNN*

- Developed an academic CNN-based multi-class image classification model for categorizing lung CT scan images.
- Applied image resizing, normalization, and data augmentation, and evaluated training and validation metrics.

Education

College of Engineering and Management, Kolaghat 2022–2026
B.Tech in Information Technology CGPA: 7.5/10

Tamluk Hamilton High School
Higher Secondary (WBCHSE) 2021–2022 | 87.4%
Secondary (WBBSE) 2019–2020 | 84.71%
